Re: Canadian Business Health Management Inc.

It is with great pleasure that I write a testimonial regarding one of your trainers, who recently instructed the Propane Safety Certification at Gravenhurst High School on Tuesday May 8, 2012.

Greg conducted the course in a professional manner. He actually made learning a lot of the Health and Safety aspects of the course interesting by providing examples of different scenarios through his work experience as a firefighter, construction worker and safety instructor. The students love to hear stories related to work experiences which provide them with a better understanding of how and why accidents occur on the job site.

Greg had an excellent rapport with the class and was able to relate his life experiences to work placements and how important it is to be trained and certified in Health and Safety.

I am very pleased with the Canadian Business Health Management team and their programs.

Sincerely,

Stephanie Walker
